<tbody>
<tr>
<td>2a: Academic</td>
<td>Community and technical colleges</td>
<td>Includes Associates Level (US); Higher Education colleges (UK); Institutes of Technology (UK/Ireland); Hochschule (Germany)</td>
</tr>
<tr>
<td>2b: Academic</td>
<td>Undergraduate or masters level college/university</td>
<td>Undergraduate (baccalaureate) or masters Level college/university (non PhD granting). Includes academic institutions with undergraduate and master's level programs, but not doctoral programs. Most records in this category are U.S.-based.</td>
</tr>
<tr>
<td>2c: Medical</td>
<td>Nursing school or allied health training program</td>
<td>Includes records for nursing schools and all other allied health training programs, but does not include medical schools. Examples: chiropractic, physical therapy.</td>
</tr>
<tr>
<td>2d: Medical</td>
<td>Community hospital or clinic</td>
<td>May have a family practice or nursing residency program, but not a major teaching or clinical research facility. Typically do not have the words “university” or “medical school” in the institution’s name and are not considered major teaching hospitals.</td>
</tr>
<tr>
<td>2e: Public/Nonprofit Government</td>
<td>Health policy or advocacy nonprofit office; charitable organization</td>
<td>Non-profit health policy/advocacy: contains think tanks, lobbying groups, and quasi-governmental organizations interested in health policy. Charitable organization: contains foundations and other organizations that collect/disburse funds for charity or carry out charitable works.</td>
</tr>
<tr>
<td>2f: Public/Nonprofit Government</td>
<td>Independent research library</td>
<td>Independent from larger institution—single site, stand-alone research library. Non-governmental, not attached to a hospital, university, or other institution research libraries. Also contains blood banks.</td>
</tr>
<tr>
<td>2g: Public/Nonprofit Government</td>
<td>Small non-profit or government laboratory</td>
<td>Independent from larger institution—simply a single site. Typically have just a handful of research programs, and have a relatively small number of staff.</td>
</tr>
<tr>
<td>2h: Public/nonprofit</td>
<td>Professional society or trade union; industry trade association</td>
<td>An organization of individuals in medicine/research designed to promote the shared interests of members. Professional society or trade union: an organization of individuals in a specific medical field or trade.</td>
</tr>
<tr>
<td>2i: Government</td>
<td>Local or regional government agency/ministry</td>
<td>Examples: city or state (US) public health authority.</td>
</tr>

<tbody>
<tr>
<td>3a: Academic</td>
<td>Doctorate-granting research university</td>
<td>Includes single academic institutions that offer doctoral programs. In the US, this includes Carnegie Research Intensive institutions (typically &lt;12,000 FTEs). Does not include universities with multiple campuses or those with attached medical schools or teaching hospitals.</td>
</tr>
<tr>
<td>3b: Academic Medical</td>
<td>Medical or pharmacy school</td>
<td>Medical school-affiliated hospitals with multiple residency programs. Hospital records in this category consist of institutions listed as teaching hospitals for example in, Profiles of U.S. Hospitals (Solucient, 2002). Contains all hospitals which have the word “university” in the name or address fields or are determined to be large facilities that have major teaching or research programs.</td>
</tr>
<tr>
<td>3c: Medical</td>
<td>Teaching or research hospital</td>
<td>Usually contain the name of a university and the words “medical school”, “faculty of medicine”, “school of medicine,” or “medical college” in the title or address.</td>
</tr>
<tr>
<td>3d: Academic Public/</td>
<td>Private, nonprofit research institute. National libraries</td>
<td>Contains institutions which are determined to be small (single-site) private or non-profit research institutes. Includes National libraries.</td>
</tr>
<tr>
<td>3e: Corporate</td>
<td>Small for-profit independent company, partnership, or organization</td>
<td>Single institution, localized campuses. Includes small for-profit companies operating from a single site with a relatively small number of employees (fewer than 50). Examples might include biotech startups, small consulting or law partnerships, or small publishers.</td>
</tr>

<td>------------------</td>
<td>---------------------------------------</td>
</tr>
<tr>
<td>4a: Academic</td>
<td>Large academic institutions</td>
<td>In the US, <strong>Carnegie Research Extensive institutions</strong> (typically &gt;12,000 FTEs). Not a consortium or shared digital library but a single organization which can incorporate separate campuses. Includes universities which have attached Medical colleges or teaching hospitals.</td>
</tr>
<tr>
<td>4b: Academic Medical Public/Nonprofit</td>
<td>Private, nonprofit research organization</td>
<td>Single institution with regional campuses. Multi-site shared access. Includes the central offices of multi-site health networks, where the access is being shared throughout the network.</td>
</tr>
<tr>
<td>4c: Public/Nonprofit Government</td>
<td>Large nonprofit/ government research institute</td>
<td>Includes the central offices of national-level government research institutes or bureaucracies. In the U.S. these are often, though not always, located in Washington, and outside of the US the offices are often located in the capital city. Also includes large non-profit research institute.</td>
</tr>
<tr>
<td>4d: Corporate</td>
<td>Mid-size for-profit organization</td>
<td>Single institution with regional campuses, not multi-national. Regional or mid-sized national corporation. Includes for-profit institutions – mostly pharmaceutical companies – that operate on a regional or national level, may have several offices/labs, and up to several hundred employees. Differs from a multinational in that they do not have a significant presence outside of their home country.</td>
</tr>
