

Read & Publish Open Access agreements

Benefits for researchers

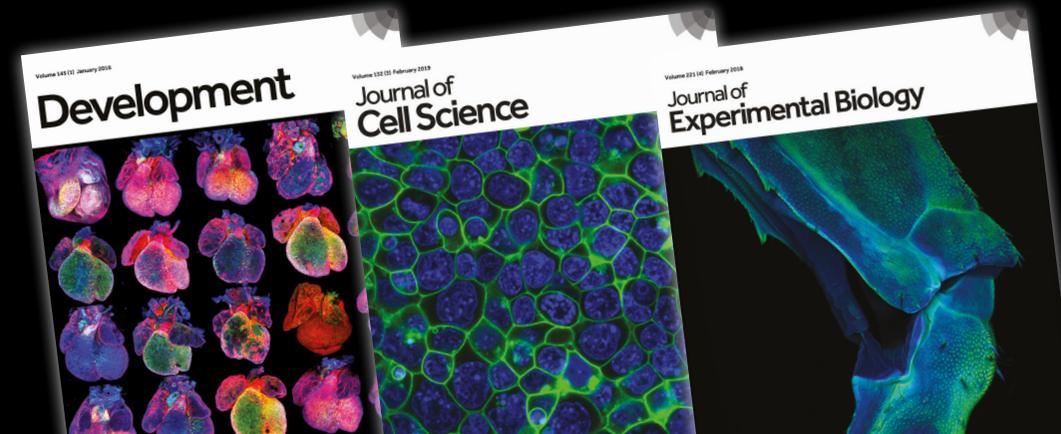

Read

- Unlimited access to new and archive content in three prestigious subscription journals

Publish

- Immediate, fee-free publishing of Gold Open Access research articles for corresponding authors
- CC-BY licence terms
- Authors retain copyright
- Easy compliance with funders' Open Access mandates
- Higher visibility of articles
- No barriers to sharing and reuse

What do authors say?

"I was delighted to have our paper accepted for publication in *Development* but the cherry on the cake was learning that our paper would be published Open Access for zero pounds and zero pence without me having to do anything."

Sally Lowell, Professor of Stem Cell Biology and Early Development, University of Edinburgh, UK

"Being able to publish Open Access articles free of charge means that my article gets maximum exposure and has maximum impact, and that all my peers can read it regardless of the agreements that their universities have with publishers. Besides the better exposure, it allows me divert more resources to research, so the benefit is doubled." **Roi Holzman, Associate Professor, Department of Zoology, Tel Aviv University, Israel**
