

Workshop programme

Rethinking cancer

20 – 23 November 2016
Wiston House
West Sussex

We are The Company of Biologists

The Company of Biologists is a not-for-profit publishing organisation dedicated to supporting and inspiring the biological community. We are run by distinguished practising scientists. We exist to profit science, not shareholders. We inspire new thinking and support the worldwide community of biologists.

We do this by publishing leading peer-reviewed journals, facilitating scientific meetings and communities, providing travel grants for young researchers and by supporting societies and gatherings.

Would you like to organise a Workshop?

As one of the scientific organisers of a Company of Biologist's Workshop, your involvement will be focused on interdisciplinary, cutting edge science and promoting new partnerships and collaborations.

Your Workshop will typically have 20 invited speakers and there'll be 10 places available for early career scientists.

We'll take care of

- all the logistical arrangements
- liaising with the venue
- organising the speaker travel
- helping arrange the programme
- funding the meeting

About our Workshops

The Company of Biologists' Workshops provide leading experts and early career scientists from a diverse range of scientific backgrounds with a stimulating environment for the cross-fertilization of interdisciplinary ideas. The programmes are carefully developed and are intended to champion the novel techniques and innovations that will underpin important scientific advances.

We offer around 10 funded places for Early Career Scientists to attend our Workshops along with the 20 speakers. We just ask that you pay for your own travel costs.

Visit www.biologists.com/workshops for more information.

Upcoming Workshops

Intercellular interactions in context: towards a mechanistic understanding of cells in organs

Organisers: Andy Ewald, Peter Friedl and John Wallingford

Date: 5th – 8th February 2017

Current status and future directions of Lévy walk research

Organiser: Stefano Focardi and Andrew Reynolds

Date: 10th – 13th September 2017

Symbiosis in the microbial world: from ecology to genome evolution

Organiser: Laura Eme, F. Joseph Pollock, Jean-Baptiste Raina, Anja Spang,
Tom Williams and John Archibald

Date: 5th – 9th November 2017

All of the above Workshops are being held at Wiston House, Steyning, West Sussex, UK.
