

Workshop

Integrative Ecology

in the Global South

Funded places for early-career researchers

We aim to gather researchers in four broad themes - ecology, evolutionary biology, physiology, and biomechanics - across the Global South, with a focus on South Asia. Our broad goals will be to identify common areas and themes of research, understand their relevance to biodiversity declines and environmental change, and discuss strategies to overcome the challenges of research in South Asia.

The Workshop will include visits to a wildlife sanctuary and introduction sessions that involve speed networking rounds so that participants understand the scope of each other's work and interests. We will have five sessions of short talks and five discussion sessions to seed many opportunities for synthesising ideas and shared outputs, starting with perspectives from early-career researchers.

Organisers

Anand Krishnan
Sanjay Sane
Anusha Shankar

Speakers

Deepak Barua
Carmela P. Española
Craig Franklin
Susma Giri

Shivani Krishna
Gustavo Londoño
Sushma Reddy
Alejandro Rico-Guevara

Juliana Senawi
Narayan Sharma
Iroro Tanshi

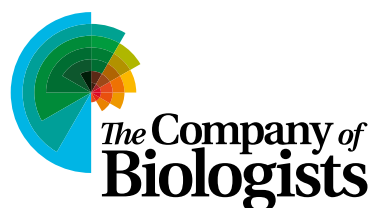

Secure your place* alongside leading experts and other early-career researchers from a diverse range of scientific backgrounds.

Deadline: 6 June 2025
