

# Workshop

## How Global South Research Can Shape the Future of Comparative Physiology

10-13 March 2024  
The Nombolo Mdhuli  
Conference Centre,  
Skukuza, Kruger National  
Park, South Africa

### Funded places for early-career researchers

Comparative physiology, a discipline of physiology that exploits the understanding of how different animals function, provides the critical link to understand how organismal performance determines geographical distributions of animals. The many exquisite adaptations to extreme environments also provide valuable animal models to understand disease mechanisms and contribute to understanding drivers for major evolutionary transitions.

Topics for discussion include:

- How to successfully integrate knowledge from various levels of biological organisation
- Research approaches and methods in modern comparative physiology
- Opportunities for Global South researchers in comparative physiology
- Resources and networks needed to support Global South researchers

#### Organisers

Kênia Cardoso Bicego  
Andrea Fuller

#### Speakers

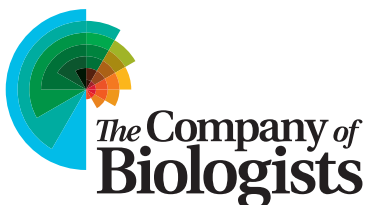

- C. Loren Buck
- Hannah Carey
- Christine Cooper
- Craig Franklin
- Luciane Gargaglioni
- Michael Hedrick
- Andrew Makanya
- Shane Maloney
- Edward Snelling
- Adalberto Luis Val
- Dehua Wang
- Tobias Wang
- Terrie Williams

Secure your place\* alongside leading experts and other early-career researchers from a diverse range of scientific backgrounds.

**Deadline: 14 July 2023**
