

Workshop

Inside Out: New Frontiers in the Comparative Physiology of the Vertebrate Gut

25-28 June 2023
Eastwell Manor
Kent, UK

Funded places for early-career researchers

This Workshop will bring together experts from a wide range of disciplines to examine the functioning of the vertebrate gastro-intestinal tract through the lens of integrative physiology. While the focus will be on the digestive tract ("Inside"), the participants will consider the consequences of gut function ("Out") for the physiology of the whole organism, its behaviour and performance, and its role in the ecosystem.

Topics for discussion include:

- The gastrointestinal microbiome
- Transport, motility and exchange processes
- Systemic and behavioural impacts of digestion
- Ecological significance of digestive physiology

Organisers

Carol Bucking
Chris M. Wood

Speakers

- | | | |
|--------------------|----------------------|--------------------|
| • Hannah Carey | • Jehan-Hervé Lignot | • Henrik Sund |
| • Kendall Clements | • Martin Llewellyn | • Yoshio Takei |
| • Erika Eliason | • Paola Navarrete | • Tobias Wang |
| • Juan Fuentes | • Catharina Olsson | • Alyssa Weinrauch |
| • Martin Grosell | • Matt Regan | • Rod Wilson |
| • Rachael Heuer | • Karen Sullam | |

Secure your place* alongside leading experts and other early-career researchers from a diverse range of scientific backgrounds.

Deadline: 15 February 2023
